

Key Investor Information

This document provides you with the key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

WS Lancaster Global Equity Fund (the "Fund"), Class I Accumulation, a fund within WS General Global Investment Funds (the "Company") (ISIN: GB00B54RK123)

Waystone Management (UK) Limited is the Authorised Corporate Director of the Fund

Objective and investment policy

Objective

To achieve growth in capital (an increase in the value of the fund) over at least a five year period, after all costs and charges have been taken. There is no guarantee that the objective will be met over any time period and you may get back less than you invest.

Investment Policy

To invest at least 65% worldwide, including emerging markets (which are countries whose economies are progressing towards becoming advanced) in equities (company shares).

The fund may also invest up to 35% worldwide, including emerging markets, in bonds (loans to either a company or government or public body that usually pay interest) with a short term rating of at least A2/P2 from either Standard & Poor's or Moody's respectively, currencies and money market instruments (which are short term loans that pay interest) and cash.

The fund may also invest up to 10% to gain commodity exposure (commodities are raw materials such as oil and precious metals, and agricultural products such as wheat and livestock) through transferable securities such as exchange traded commodities. Investments in open ended funds are limited to 10% of the fund's net asset value.

The Investment Manager utilises a number of risk analysis techniques, including but not limited to the historical price of a security, considering research in respect of a security and researching and assessing the economic status of the market in which the security is listed or traded.

The Investment Manager uses a flexible investment approach which aims to take account of and is responsive to anticipated changes in economic and market conditions allowing the fund to typically diversify its exposure across a range of individual investments and industry sectors.

Other features of the fund:

- The fund is actively managed. The Investment Manager uses its expertise to select investments for the fund and has the discretion to invest in shares with no geographical limits and with no need to adhere to a particular benchmark.
- The fund can invest in other funds (including those managed by the Manager, the Investment Manager and its associates).
- The fund can invest across different geographic regions, industry sectors and market capitalisations without limitation.
- Exposure to commodities will be through indirect investments only.
- Up to 35% of the fund may be invested in emerging markets equities.
- You can buy and sell shares in the fund on each business day.
- Income from the fund will be added to the value of your investment.
- Derivatives (whose value is linked to that of another investment, e.g company shares, currencies) may be used to manage the risk profile of the fund.
- In extraordinary market conditions which could result in significant loss, the fund has the ability to invest up to 50% in lower risk assets such as cash.
- Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and reward profile

- This indicator shows how much a fund has risen and fallen in the past, and therefore how much a fund's returns have varied. It is a measure of a fund's volatility. The higher a fund's past volatility the higher the number on the scale and the greater the risk that investors in that fund may have made losses as well as gains.
- The fund has been classed as 6 because its volatility has been measured as above average to high.
- This indicator is based on historical data and may not be a reliable indication of the future risk profile of this fund.
- The risk and reward profile shown is not guaranteed to remain the same and may shift over time. The lowest number on the scale does not mean that a fund is risk free.
- Currency Risk: As the fund can be exposed to different currencies, changes in exchange rates may decrease the value of your investment.
- Counterparty Risk: The failure of a firm involved in a transaction with the fund or providing services to the fund may expose the fund to financial loss.
- Emerging Markets Risk: The fund may invest in emerging markets, which are markets in countries that are developing. Emerging markets may have more political and economic risks than developed markets, resulting in price movements that may cause a loss to the fund.
- Alternative Investment Risk: The fund may invest in other investment vehicles to gain indirect exposure to alternative assets including commodities. Exposure to such investments can involve a higher degree of risk that may increase the risk of investment loss. The performance of such vehicles can be volatile and there is a risk that investors may experience a delay in receiving redemption proceeds.
- Changes in Interest Rate risk - A rise in interest rates generally causes bond prices to fall.
- Liquidity Risk: The fund may invest in assets where, in difficult market conditions, there is an increased risk that a position cannot be bought or sold in a timely manner or at a reasonable price and the Manager may suspend dealing in the fund.
- Concentrated fund: The fund may hold a large weighting in a small number of investments and may therefore be subject to larger than normal swings in its value.
- Smaller Companies Risk: Shares in smaller companies' are often traded less frequently than those of larger companies which means they may be more difficult to buy and sell. Their prices may also be subject to short term swings (both up and down) in their value.
- For more information about the fund's risks please see the Risk Factors section of the prospectus which is available at www.waystone.com.

Charges for this fund

The charges you pay are used to pay the costs of running the fund. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry Charge	5.00%
This is the maximum that might be taken out of your money before it is invested.	
Exit Charge	None
Charges taken from the fund over the year	
Ongoing Charges	1.19%
Charges taken from the fund under certain specific conditions	
Performance Fee	None

The entry charge shown is a maximum figure. In some cases investors may pay less. You can find out the actual charges from your financial advisor or distributor.

The ongoing charges figure is based on expenses as at 30 June 2023. This figure may vary from year to year. The ongoing charges are taken from the income of the fund. They exclude portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

You may also be charged a dilution levy (an amount to cover dealing costs incurred by the fund) on entry to or exit from the fund.

For more information about charges, please see the Company's prospectus which is available at www.waystone.com.

Past performance

- Past performance is not a guide to future performance.
- The past performance in the chart shown opposite is net of tax and charges but excludes the entry charge that may be paid on the purchase of an investment. The share class was launched in December 2011.
- The fund was launched in December 2006. The fund was renamed in September 2023, and was previously known as LF Odey Opus Fund.
- Past performance takes into account all charges and costs
- Past performance is calculated in GBP
