

Non-UCITS Retail Scheme Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

abrdn Global Real Estate Fund, a Sterling denominated sub fund of the abrdn Global Real Estate Fund, Institutional Inc Shares (ISIN: GB00B0LD3Y28). This fund is managed by abrdn Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate income and some growth over the long term (5 years or more) by investing in global commercial property markets.
Performance Target: To generate a return of 5% per annum over rolling three year periods, after charges. There is no certainty or promise that the Performance Target will be achieved.

Investment Policy

Portfolio Securities

- The fund invests at least 80% in global commercial property and property-related equities (company shares) with the potential for up to 100% to be held in commercial property at any time.
- The fund may also invest indirectly in commercial property through investment vehicles such as companies both listed and not listed on a stock exchange or funds (including those managed by abrdn).
- The fund may also invest in cash and assets that can be turned into cash quickly.

Management Process

- The management team use their discretion (active management) to identify investments that are expected to benefit from changes in property prices and property improvements. They will maintain a diverse asset mix at country and sector level.
- The fund will not hold more than 35% of its assets in emerging market countries.
- Non-sterling denominated assets will typically be hedged back to sterling to reduce exposure to currency rate movements.
- Please note: Selling property can be a lengthy process so investors in the fund should be aware that, in certain circumstances, they may not be able to sell their investment when they want to.

Derivatives and Techniques

- The fund may use derivatives to reduce risk, reduce cost and/or generate additional income or growth consistent with the risk profile of the fund.

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.
- Where derivatives are used, this would typically be to maintain allocations following a significant inflow into the fund or to manage currency risk.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).

If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

Investors should be aware of the following risk factors:

- **Property Liquidity Risk** - Property is less liquid than other asset classes. Selling property can be a lengthy process so investors in the fund should be aware that they may not be able to sell their investment when they want to.
- **Property Transaction Charges** - Property transaction charges are higher than those which apply in other asset classes. Investors should be aware that a high volume of transactions would have a material impact on fund returns.
- **Property Valuation Risk** - Property valuation is subjective and based on the judgment of an independent valuer, it is therefore a matter of the valuer's opinion rather than fact.
- **Equity Risk** - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- **Real Estate Investment Trust (REIT) Risk** - Dividend payment policies of the REITs in which the fund invests are not representative of the dividend payment policy of the fund.
- The fund invests in emerging market equities and / or bonds. Investing in emerging markets involves a greater risk of loss than investing in more developed markets due to, among other factors, greater political, tax, economic, foreign exchange, liquidity and regulatory risks.
- **Derivatives Risk** - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.
- **Single Swinging Price Risk** - The fund employs a single swinging pricing methodology to protect against the dilution impact of transaction costs. Due to the high transaction charges associated with the fund's assets, a change in the pricing basis will result in a significant movement in the fund's published price.

All investment involves risk. This fund offers no guarantee against loss or that the fund's objective will be attained.

The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.

Inflation reduces the buying power of your investment and income.

The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.

The fund could lose money if an entity (counterparty) with which it does

business becomes unwilling or unable to honour its obligations to the fund.

In extreme market conditions some securities may become hard to value or sell at a desired price. This could affect the fund's ability to meet redemptions in a timely manner.

The fund could lose money as the result of a failure or delay in operational processes and systems including but not limited to third party providers failing or going into administration.

CHARGES

The charges you pay are used to pay the costs of running the fund including marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the fund over a year

Ongoing charges	0.99%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	0.00%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find this out from your financial adviser. The Ongoing Charges figure reflects the amount based on the expenses within the annual report for each financial year. This figure may vary from year to year. It excludes: performance fees (where applicable); portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling in another collective investment undertaking.

Where the Fund invests in an open-ended collective investment scheme which is operated or managed by the ACD/the Manager or an associate of the ACD/the Manager, no additional annual management charge will be incurred by the Fund on such an investment.

The annual report for each financial year will include detail on the exact charges made.

The Ongoing Charge figure is as at 30/04/2023.

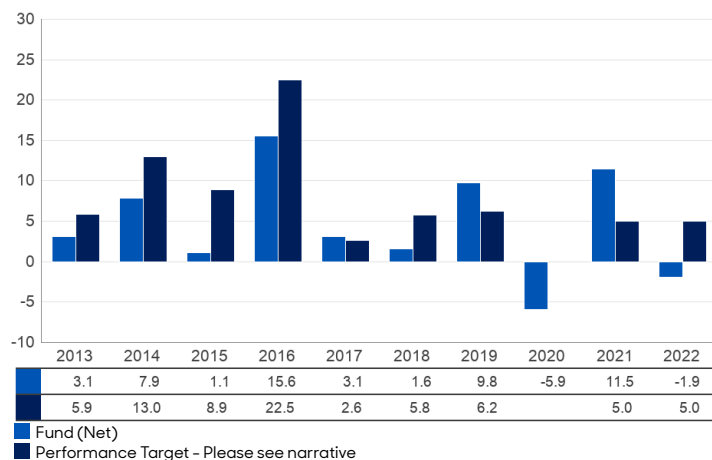

A switching charge may be applied in accordance with the Prospectus. For more information about charges please see Prospectus.

Further information on the charges can be found in the Prospectus.

abrdn Global Smaller Companies Fund, a Sterling denominated sub fund of the abrdn OEIC II, Platform 1 Acc Shares (ISIN: GB00B7KVX245). This fund is managed by abrdn Fund Managers Limited.

OBJECTIVES AND INVESTMENT POLICY

Investment Objective

To generate growth over the long term (5 years or more) by investing in Global small-capitalisation equities (company shares).
Performance Target: To achieve the return of the MSCI AC Country World Small Cap Index, plus 3% per annum (before charges). There is no certainty or promise that the Performance Target will be achieved.
Performance Comparator: Investment Association Global Equity Sector Average.
The MSCI AC Country World Small Cap Index (the "Index") is a representative index of world stock markets of smaller companies. The Investment Association Global Equity Sector (the "Sector") is a representative group of investment funds with a focus on global equities.

Investment Policy

Portfolio Securities

- The fund will invest at least 70% in equities of global smaller companies.
- Global smaller companies are defined as any company of a size similar to those in the Index.
- The fund may also invest in larger global companies.
- The fund may also invest in other funds (including those managed by abrdn), cash and assets that can be turned into cash quickly.

Management Process

- The management team use their discretion (active management) to maintain a diverse asset mix at country, sector and company level.
 - Their primary focus is on company selection using the management team's quality, growth and momentum approach. It aims to identify companies that exhibit a range of high quality characteristics, have the ability to deliver sustained long term growth and are displaying positive growth in their earnings.
 - Due to the active nature of the management process, the fund's performance profile may deviate significantly from that of the Index.
- Please note: The fund's ability to buy and sell small and mid-capitalisation shares and the associated costs can be affected during periods of market stress. In certain circumstances investors in the fund may not be able to sell their investment when they want to.

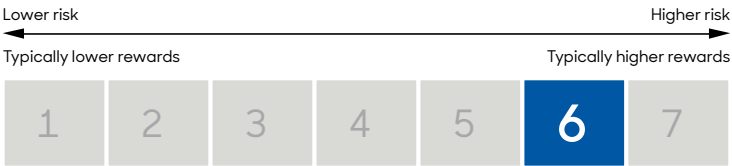

Derivatives and Techniques

- Derivatives are linked to the value of other assets. In other words, they derive their price from one or more underlying asset.

- Derivative usage in the fund is expected to be very limited. Where derivatives are used, this would mainly be in response to significant inflows into the fund so that in these instances, cash can be invested while maintaining the fund's existing allocations to equities.

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus).
If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.
Recommendation: the fund may not be appropriate for investors who plan to withdraw their money within five years. Investors should satisfy themselves that their attitude to risk aligns with the risk profile of this fund before investing.

RISK AND REWARD PROFILE

This indicator reflects the volatility of the fund's share price over the last five years which in turn reflects the volatility of the underlying assets in which the fund invests. Historical data may not be a reliable indication for the future.
The current rating is not guaranteed and may change if the volatility of the assets in which the fund invests changes. The lowest rating does not mean risk free.
The fund is rated as 6 because of the extent to which the following risk factors apply:

- Equity Risk - The fund invests in equity and equity related securities. These are sensitive to variations in the stock markets which can be volatile and change substantially in short periods of time.
- Smaller and Mid Cap Risk - The shares of small and mid-cap companies may be less liquid and more volatile than those of larger companies.
- ESG Investment Risk - Applying ESG and sustainability criteria in the investment process may result in the exclusion of securities within the fund's benchmark or universe of potential investments. The interpretation of ESG and sustainability criteria is subjective meaning that the fund may invest in assets which similar funds do not (and thus perform differently) and which may not align with the personal views of any individual investor.
- Derivatives Risk - The use of derivatives may involve additional liquidity, credit and counterparty risks. In some cases the risk of loss from derivatives may be increased where a small change in the value of the underlying investment may have a larger impact on the value of the derivative.

All investment involves risk. This fund offers no guarantee against loss or

that the fund's objective will be attained.
The price of assets and the income from them may go down as well as up and cannot be guaranteed; an investor may receive back less than their original investment.
Inflation reduces the buying power of your investment and income.
The value of assets held in the fund may rise and fall as a result of exchange rate fluctuations.
The fund could lose money if an entity (counterparty) with which it does business becomes unwilling or unable to honour its obligations to the fund.
