

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Close Managed Conservative Fund – X (Accumulation)

A sub-fund of Close Discretionary Funds unit trust (ISIN: GB00B45DZX99)

This Fund is managed by Close Asset Management (UK) Limited

Objective and investment policy

Objective: To deliver moderate capital growth with some income over the medium term (i.e. more than 5 years).

Investment policy: The Fund will hold at least 80% of its portfolio in a mixture of equities and fixed interest securities, achieving this exposure through investment in actively and passively managed collective investment schemes (which may include collective investment schemes managed by the Manager or by an affiliate of the Manager), closed ended funds and exchange traded funds.

The Fund is actively managed, with the manager employing a strategic asset allocation model (developed in collaboration with an external provider) that is matched to a specific risk and volatility band. Accordingly, the allocation to particular asset classes may vary over time at the investment manager's discretion as is consistent with a conservative risk and volatility level and in response to changing market conditions. However, the allocation to equities will remain within a 20-60% range, consistent with its risk/return profile.

The underlying equity component of the Fund may include equities of companies from anywhere in the world, in any sector and of any market capitalisation. This may include shares in smaller companies and companies listed in emerging markets.

The underlying fixed interest component may include government and corporate bonds (which may include emerging market and high yield bonds). These may be investment grade, sub-investment grade or unrated.

The Fund may also invest in other transferable securities, money market instruments, deposits, cash and near cash. There may be occasions where the Manager considers that it is prudent, given market conditions, to maintain higher levels of liquidity in the Fund. In such circumstances, the Manager may hold up to 20% of the Fund in cash.

The Fund may gain exposure to alternative asset classes, such as commodities, hedge funds, infrastructure, property and convertibles through investment in transferable securities.

The Fund may use derivatives, including exchange traded and over the counter derivatives, forward transactions and currency hedges for investment purposes as well as for efficient portfolio management.

Other information:

Units can be bought, sold or switched in the Fund on any business day, as defined in the Prospectus.

An order must be received by the Administrator by 11:45am on any business day to receive that day's fund price. Please note that if an order is placed by an intermediary or Financial Adviser they may require extra processing time.

Units will be accumulation units. Income from investments held by the Fund will be invested into the value of the units.

The Fund should be regarded as a long term investment and may not be appropriate for investors who plan to withdraw their money in the short to medium term i.e. within 5 years.

Risk and reward profile

The Risk and Reward profile demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data (the past 5 years), may change over time and may not be a reliable indication of the future risk profile of the Fund.

The Fund is ranked at 4 because funds of this type have experienced average rises and falls in value in the past.

Past performance is not a reliable guide to future performance. The lowest category does not mean risk free.

Investing in the Fund carries the following main risks:

Currency risk: The Fund invests in overseas assets, denominated in currencies other than Sterling. Changes in exchange rates may have a negative impact on the value of your investment.

Default risk: The Fund may invest in bonds which provide a fixed or variable return and which are a form of loan, the value of which depends on the issuer being able to make its payments. There is a risk that the issuer will fail to do so. Although the Fund generally invests in bonds with high ratings, a high rating does not guarantee an issuer's ability to pay.

Emerging Markets risk: The Fund may invest in emerging markets which can involve a higher element of risk due to less well regulated markets and the potential for political and economic instability.

Focus risk: The Fund's value may fall where it has concentrated exposure to an issuer or type of security that is heavily affected by an adverse event.

Funds of funds – Liquidity risk: The Fund invests in other funds and its liquidity depends upon the liquidity of those underlying funds. If underlying funds suspend or defer the payment of redemption proceeds, the Fund's ability to meet redemption requests may also be affected.

Investment risk: The Fund invests in equities and bonds globally. Share prices can rise or fall due to a number of factors affecting global stock markets.

Liquidity risk: In extreme market conditions, some securities held by the fund may become hard to value or sell. In these circumstances, performance may be affected and redemptions in the fund may need to be deferred or the fund suspended for a period of time.

Management risk: Investment management techniques that have worked well in normal market conditions could prove ineffective or detrimental at other times.

The full list of the Fund's risks are contained in the "Risk Factors" section of the Prospectus.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of managing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	0.00%
Exit charge	0.00%

The entry charge is the maximum that could be taken out of your money before it is invested. There are no entry and exit charges.

Charges taken from the Fund over a year

Ongoing charges	1.04%
-----------------	-------

Charges taken from the Fund under certain specific conditions

Performance fee	None
-----------------	------

The figure for ongoing charges excludes portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares or units in another fund and transaction costs paid to the custodian of the Fund.

The ongoing charges are based on the Fund's expenses for the twelve months ending 30 September 2023, this now includes the Fund Management Fee which is fixed. Ongoing charges may vary from year to year. The Closed-Ended Funds synthetic cost is 0.09%. Following the recent changes to disclosure requirements; Closed-Ended Funds are now excluded in the calculation of the synthetic element of the ongoing charge.

Further information about charges can be found in the Fees section of the Prospectus.

If you invest through a third party provider (including platforms) you are advised to consult them directly as charges, performance, and terms and conditions may differ materially to those shown in this document.

Past performance

The past performance is calculated in GBP.

This chart includes all charges except entry and exit charges. You should be aware that past performance is not a reliable guide to future performance.

Fund launch date – 17 October 2011.

Unit class launch date – 1 October 2012.

Practical information
