BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Inflation-Linked Corporate Bond Fund

INSTITUTIONAL SHARES W (ACCUMULATION) (ISIN: GB00B8HY5051)

a sub-fund of BNY Mellon Investment Funds. This Fund is managed by BNY Mellon Fund Managers Limited

Objectives and Investment Policy

OBJECTIVE

To generate income and capital growth over the long term (5 years or more).

POLICY

The Fund will:

- invest at least 80% of the portfolio in inflation-linked corporate bonds and/or the following assets which in combination provide the investment characteristics of inflation-linked corporate bonds: corporate bonds, government and public securities and other debt securities;
- invest mainly in sterling denominated and non-sterling denominated bonds and similar debt investments. For those investments not denominated in sterling, the Fund will use techniques to try to eliminate the effects of changes in the exchange rate between sterling and other currencies (i.e. hedging). This aims to protect the Fund against losses caused by currency movements between the Fund's base currency, sterling, and the currency of the underlying assets of the Fund; and
- invest in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income.

The Fund may:

- invest in money market instruments, deposits, cash and near cash;

- invest more than 35% of its assets in government and public securities issued or guaranteed by a single state, local authority or public international body;
- invest in bonds that are rated below investment grade (BBB-) by Standard & Poor's (or other such recognised rating agency); and
- invest up to 10% in other collective investment schemes.

Benchmark: The Fund will measure its performance against the UK Investment Association Sterling Strategic Bond NR Sector average as a comparator benchmark (the "Benchmark"). The Fund will use the Benchmark as an appropriate comparator as, although not representative of inflation-linked corporate bond funds specifically, it represents a broad range of sterling-denominated bond funds that invest in corporate bonds, government bonds and derivatives.

The Fund is actively managed, which means the Investment Manager has discretion over the selection of investments, subject to the investment objective and policies disclosed in the Prospectus.

OTHER INFORMATION

Treatment of income: net income generated will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (UK time) on each business day in England and Wales. Instructions received before 12:00 will receive the price quoted on that day. The minimum initial investment for this share class is GBP 500,000.

Risk and Reward Profile

We have calculated the risk and reward indicator, as shown above. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility). It is not a guide to the future risk and reward rating of the Fund. The rating shown is not a target or guarantee and may shift over time. Even the lowest rating of 1 does not mean a risk-free investment.

This Fund is rated 4 because its historical value has shown moderate volatility. With a Fund rating of 4, you have a moderate risk of losing money but your chance for gains is also moderate.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

Objective/Performance Risk: There is no guarantee that the Fund will achieve its objectives.

Currency Risk: This Fund invests in international markets which means it is exposed to changes in currency rates which could affect the value of the Fund.

Derivatives Risk: Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.

Changes in Interest Rates & Inflation Risk: Investments in bonds/ money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.

Credit Ratings and Unrated Securities Risk: Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.

Credit Risk: The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.

Real Estate Investment Trust (REITs) Risk: The Fund is subject to risks associated with investing in real estate which may include but is not limited to liquidity constraints arising from difficulties with the disposal of the underlying properties, fluctuations in the value of underlying properties, defaults by borrowers or tenants, market saturation, changes in general and local economic conditions, decreases in market rates for rents, increases in competition, property taxes, capital expenditures or operating expenses and other economic, political or regulatory occurrences affecting companies in the real estate industry.

CoCo's Risk: Contingent Convertible Securities (CoCo's) convert from debt to equity when the issuer's capital drops below a pre-defined level. This may result in the security converting into equities at a discounted share price, the value of the security being written down, temporarily or permanently, and/or coupon payments ceasing or being deferred.

Counterparty Risk: The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

Geographic Concentration Risk: Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
