Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Royal London UK Dividend Growth Fund (Accumulation - Class M Shares)

A sub-fund of Royal London Equity Funds ICVC ISIN: GB00B63DTG61
Managed by Royal London Unit Trust Managers Limited

Objectives and investment policy

Objective The Fund's investment objective is to achieve a growing income with some capital growth over the medium term (3-5 years) by investing at least 80% in the shares of medium-sized and larger UK companies listed on the London Stock Exchange.
The Fund's performance target is to outperform, after the deduction of charges, the FTSE All-Share Total Return GBP Index (the "Index") over rolling 5-year periods. For further information on the Fund's index, please refer to the Prospectus.
The Fund is actively managed.

Policy At least 65% of the Fund will be invested in the shares of listed UK companies, which are those domiciled in the UK, or which have significant UK business operations. Up to 30% of the Fund's assets may be invested in the shares of companies that are not UK companies (as defined above), but which are listed in the UK.
Of the Fund's share holdings, at least 70% will form part of the FTSE 350 Index, which covers large and medium-sized companies . The remainder may be invested in smaller companies.
A limited amount of the Fund's assets may be invested in exchange-traded funds, money market instruments, transferable securities and deposits.
The Fund may also invest a small amount of its portfolio in derivatives (investments that derive their value from another closely related underlying investment) for the purposes of efficient portfolio management (EPM).
Up to 5% of assets can be invested in cash.

Recommendation The Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Concepts to understand

Capital Growth Capital growth is defined as the rise in an investment's value over time.

Rolling 5 Year Period A rolling 5-year period is any period of five years, no matter which day you start on.

Efficient Portfolio Management A list of approved investment techniques, including the use of derivatives, used to protect against excessive risk, reduce cost or generate extra income or growth.

You can buy and sell your shares on each working day, except public holidays, at 12:00 noon if you tell us before 12:00 noon that you want to do so. Instructions received after 12:00 noon will be processed at 12:00 noon on the following working day.

Other share classes may be available as described in the Prospectus. If this is an income share class, any income will be paid out to you. If this is an accumulation share class, any income will be reinvested in the Fund.

Risk and reward profile

1	2	3	4	5	**6**	7

Lower risk — Higher risk

Typically lower rewards — Typically higher rewards

The fund is shown in risk category 6 because its share price has shown a high level of volatility historically. The indicator has been calculated using historical data and may not be a reliable indication of the future risk profile of the Fund. As an investment, shares are typically more volatile than money market instruments and bonds.
The risk and reward indicator is not a measure of the expected rise or fall in capital but shows how sharply the Fund's share price has gone up and down historically.
A fund whose share price has experienced sharp or large increases or decreases will sit in a higher risk category, whereas a fund whose share price has experienced small or gradual increases or decreases will sit in a lower risk category.
The indicator is calculated using a standard methodology derived from EU rules.
The risk/reward indicator is an estimate and not a guarantee. Going forward, the Fund's actual volatility could be higher or lower, and its rated risk/reward profile could change. The lowest risk category does not mean the investment is risk free.
The risk indicator does not adequately capture the following risks, which are materially relevant to the Fund:
Investment Risk The value of investments and any income from them may go down as well as up and is not guaranteed. Investors may not get back the amount invested.
EPM Techniques The Fund may engage in EPM techniques including holdings of derivative instruments. Whilst intended to reduce risk, the use of these instruments may expose the Fund to increased price volatility.
Counterparty Risk The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
Charges from Capital Risk Charges are taken from the capital of the Fund. Whilst this increases the yield, it also has the effect of reducing the potential for capital growth.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing the Fund. These charges reduce the potential growth of the investment.

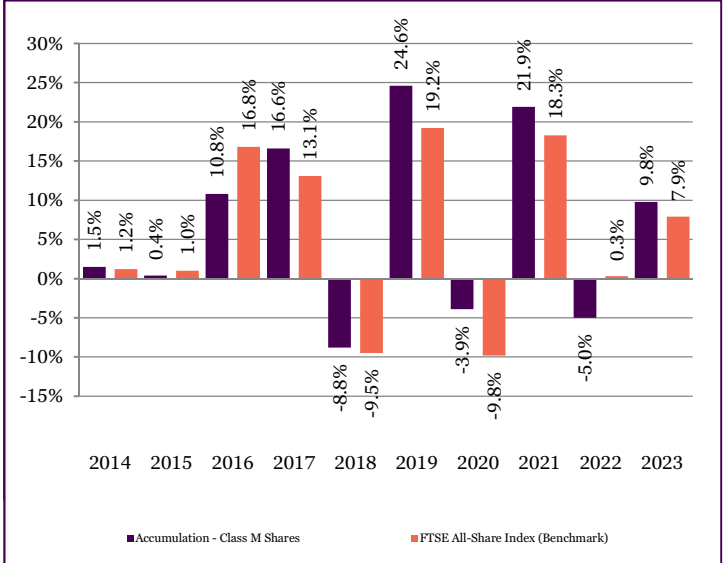

One-off charges taken before or after you invest:	
Entry charge	None
Exit charge	None
Charges taken from the fund over a year:	
Ongoing charge	0.71%
Charges taken from the fund under specific conditions:	
Performance fee	None

The entry and exit charge is the maximum that might be taken out of your money before it is invested or before the proceeds of your investment are paid out.
Ongoing charge is based on the Fund Management Fee (FMF), which is the periodic fee paid to the ACD to cover the expenses of the Fund. This figure does not include portfolio transaction costs. Ongoing charges are the same for all investors in the share class.

Past performance

The graph shows fund performance over the past 10 years where available. The figure for a given year shows how much the Fund increased or decreased in value during that year. These results reflect ongoing charges taken from the Fund, but do not reflect any entry charges you might have to pay.
The Fund was launched on 1 June 1981 as a unit trust and converted to an open-ended investment company (OEIC) on 30 April 2010. The share class launched on 17 May 2012.

The Royal London UK Dividend Growth Fund (Accumulation - Class M Shares) *in GBP*

Past performance is not a guide to future performance and may not be repeated.
The chart shows performance in British Pounds after the ongoing charges and the portfolio transaction costs have been paid. Entry and exit charges are excluded from calculations of past performance. The past performance is calculated in British Pounds, with net dividends reinvested.

Practical information
