OBJECTIVES AND INVESTMENT POLICY

- The objective of the Fund is to track the performance of the FTSE World -Technology Index, the "**Benchmark Index**" on a net total return basis before fees and expenses are applied. Fund performance may differ from the Benchmark Index due to the deduction of fees and expenses and the impact of any tracking error factors.
- The Benchmark Index is comprised of shares in companies from the developed and advanced emerging markets that are engaged in information technology and are included in the Benchmark Index.
- The Fund seeks to replicate the Benchmark Index and its investments will closely match those that make up the Benchmark Index.
- The Fund will have at least 90% exposure (directly or through depositary receipts (a certificate issued by a bank representing shares in a foreign company such as American depositary receipts and global depositary receipts)) to assets that are included in the Benchmark Index.
- The Fund may also invest in money market instruments (such as treasury bills), depositary receipts, cash, deposits, shares in companies which are reasonably expected to become part of the Benchmark Index in the near future or are an alternative to a constituent of the Benchmark Index and collective investment schemes, including those managed or operated by the Manager or an associate of the Manager.
- The Fund may use derivatives (contracts which have a value linked to the price of another asset) to:
  - reduce risk or cost; or
  - generate additional capital or income with no, or an acceptably low, level of risk.

RISK AND REWARD PROFILE

Lower Risk — Higher Risk

Potentially lower rewards — Potentially higher rewards

1	2	3	4	5	**6**	7

- The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is not guaranteed to remain the same and may change over time. It is based on historical data and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table above shows the Fund's ranking on the Risk and Reward Indicator.
- The Fund is in category 6 because it invests in company shares which are sensitive to variations in the stock market. The value of company shares can change substantially over short periods of time. Company shares are generally considered to be higher risk investments than bonds or cash.
- Even a fund in the lowest category is not a risk free investment.
- The value of your investment may fall as well as rise and is not guaranteed. You might get back less than you invest.

Further information on the risks of investing in this fund is contained in the Prospectus available at **www.legalandgeneral.com/reports**.

The risk and reward indicator may not take account of the following risks of investing in the Fund:

- The return from this Fund is dependent on relatively few individual investments. This means that a fall in the value of an individual investment can have a major impact on the overall performance of the Fund.
- Most of the Fund holds investments from a particular market sector, that of information technology. Funds like this can be more volatile than funds that invest across many market sectors. This is because the value of the Fund can go up and down more often and by larger amounts than funds that are spread more widely, especially in the short-term.
- The Fund may have underlying investments that are valued in currencies that are different from GBP. Exchange rate fluctuations will impact the value of your investment. Currency hedging techniques may be applied to reduce this impact but may not entirely eliminate it.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains.
- The Fund could lose money if any institutions providing services such as acting as counterparty to derivatives or other instruments, becomes unwilling or unable to meet its obligations to the Fund.

Other costs:

- **Dilution adjustment:** On any day, the prices for buying or selling units in this Fund are the same. The Fund manager calculates a single price for this Fund based on the mid-point between the buying and selling prices of the Fund's assets. In certain circumstances, the Fund manager can adjust this price to account for whether there is more money going into or coming out of the Fund. This is called a 'dilution adjustment'.
- This can vary but as an example for this Fund we estimate 0.05% for purchases and 0.07% for sales at 31 December 2023. The amount of the dilution adjustment may differ in future.
